the world is losing species and biodiversity at an unprecedented rate the causes go deep and the losses are driven by a complex array of social economic political and
biological factors at different levels immediate causes such as over harvesting pollution and habitat change have been well studied but the socioeconomic factors driving
people to degrade their environment are less well understood this book examines the underlying causes it provides analyses of a range of case studies from brazil cameroon
china danube river basin india mexico pakistan philippines tanzania and vietnam and integrates them into a new and interdisciplinary framework for understanding what is
happening from these results the editors are able to derive policy conclusions and recommendations for operational and institutional approaches to address the root causes
and reverse the current trends it makes a contribution to the understanding of all those from ecologists and conservationists to economists and policy makers working on
one of the major challenges we face

for every effect there is a cause learn in this teaching what are some root causes of sicknesses and diseases and uproot them one by one until you can walk free

this book defines more than 900 metrics measuring compliance with current legislation, resiliency of security controls, and return on investment. It explains what needs to be measured, why, and how to measure it, and how to tie security and privacy metrics to business goals and objectives. The metrics are scaled by information sensitivity, asset criticality, and risk, aligned to correspond with different lateral and hierarchical functions, designed with flexible measurement boundaries, and can be implemented individually or in combination. The text includes numerous examples and sample reports and stresses a complete assessment by evaluating physical personnel and operational security controls.
