Le radici epistemologiche della Allgemeine Psychopathologie di Karl Jaspers Interventi in psichiatria e psicoterapia dell'et[?] evolutiva Manuale di criminologia clinica Archivio di psicologia, neurologia, psichiatria e psicoterapia Sante De Sanctis tra psicologia generale e psicologia applicata Strumenti e tecniche di riabilitazione psichiatrica e psicosociale Psichiatria e fenomenologia. Con un saggio di Borgna E. Manuale di psichiatria Petrini Vincenzo Amendolagine Marica Magnano San Lio Giancarlo Rigon Marco Strano Guido Cimino Gabriella Ba Umberto Galimberti Roberto Quaresan

il libro conduce il lettore in un esplorazione dei fondamenti della psicologia clinica della psichiatria clinica e della psicoterapia si parte dagli attuali contesti della psicologia clinica e della psichiatria clinica per giungere ai differenti paradigmi terapeutici la monografia illustra gli archetipi concettuali e gli ambiti applicativi della psicologia clinica e della psichiatria clinica la psicodiagnostica con elementi di psicopatologia generale e neuropsicologia la psiconcologia il comportamento umano considerato nelle differenti ottiche epistemiche etologica biologica psicodinamica cognitivo comportamentale umanistico esistenziale e socioculturale la psicologia e la psicopatologia dell'et[?] evolutiva la psicologia e la psicopatologia dell'et[?] adulta e della senescenza la psicosomatica e la psicologia del benessere la psicofarmacologia clinica le psicoterapie individuale gruppale e infantile e la psicagogia educativa simbolica

italiano il lavoro rintraccia e ricostruisce le radici epistemologiche della allgemeine psychopathologie 1913 di karl jaspers sottolineandone il carattere originale ed innovativo e contestualizzandola entro il dibattito scientifico e storico psichiatrico del tempo con particolare attenzione per le significative interazioni che gi[?] dalla prima edizione e in modo pi[?] esplicito dalla quarta del 1946 vi si possono scorgere tra tematiche psichiatriche ed argomentazioni filosofiche tali interazioni si colgono gi[?] del resto nel complesso processo della formazione psicopatologica di jaspers in modo particolare guardando al tirocinio effettuato presso la clinica psichiatrica di heidelberg ed alla interazione con le principali fonti psichiatriche della pi[?] recente tradizione tedesca soprattutto wilhelm griesinger ed emil kraepelin jaspers convinto della sostanziale irriducibilit[?] dell'individuo a qualsiasi forma di rigorosa oggettivazione critica l'orientamento organicista della psichiatria del tempo la dimensione psichica costituisce un vissuto che come tale possiede connotazioni qualitative mai del tutto riconducibili a semplici alterazioni fisiologiche da qui l'esigenza di collocare la spiegazione scientifica dei processi psichici entro una comprensione del soggetto assai piu' ampia ed articolata jaspers propone e sostiene infatti un pluralismo metodologico in grado di coniugare il metodo empirico descrittivo dell'erkla ren proprio delle naturwissenschaften e quello fenomenologico immedesimativo del verstehen riferibile invece alle geisteswissenschaften cosi da rendere possibile una piu' adeguata comprensione della soggettivita e nello stesso tempo

una non meno importante tutela della costitutiva specificità individuale soltanto una proficua interazione tra scienze della natura e scienze dello spirito tra psichiatria e filosofia permette infatti di cogliere la vita psichica nella sua complessità e peculiarità english this work traces and reconstructs the epistemological roots of karl jaspers allgemeine psychopathologie 1913 emphasising its original and innovative character and contextualising it within the scientific and historical psychiatric debate of the time with particular attention to the significant interactions that can be discerned between psychiatric themes and philosophical arguments as early as the first edition and more explicitly from the fourth of 1946 such interactions can already be grasped moreover in the complex process of jaspers psychopathological training particularly when looking at his apprenticeship at the psychiatric clinic in heidelberg and his interaction with the main psychiatric sources of the more recent german tradition especially wilhelm griesinger and emil kraepelin jaspers convinced of the substantial irreducibility of the individual to any form of rigorous objectification criticises the organicist orientation of the psychiatry of the time the psychic dimension constitutes an experience that as such possesses qualitative connotations that can never be fully ascribed to simple physiological alterations hence the need to place the scientific explanation of psychic processes within a much broader and more articulate understanding of the subject jaspers proposes and sustains in fact a methodological pluralism capable of combining the empirical descriptive method of *erklären* proper to naturwissenschaften and the phenomenological inmedesimative method of *verstehen* referable instead to geisteswissenschaften so as to make possible a more adequate understanding of subjectivity and at the same time a no less important protection of the constitutive individual specificity only a fruitful interaction between the natural sciences and the sciences of the spirit between psychiatry and philosophy makes it possible in fact to grasp psychic life in all its complexity and peculiarity

il tema degli interventi terapeutici in psichiatria e psicoterapia del bambino e dell'adolescente molto attuale ma sono pochi i testi che forniscono modelli di intervento e indicazioni tecniche precise infatti il tema della terapia breve e in condizioni di urgenza pur essendo di estremo interesse ancora poco conosciuto nel nostro paese questo libro nasce dall'esperienza clinica e di ricerca maturata in questi anni presso il centro diurno per preadolescenti ed adolescenti con gravi disturbi psicopatologici e presso il servizio ospedaliero di psichiatria e psicoterapia dell'et evolutiva dell'asl città di bologna entrambe realtà pilota a livello nazionale che forniscono trattamenti intensivi ad alta densità terapeutica in situazioni gravi o di urgenza in psichiatria dell'et evolutiva il volume raccoglie il risultato del confronto con alcuni fra i più qualificati esperti del settore a livello nazionale ed europeo sui temi dell'intervento psicoterapico breve focale e in condizione di crisi della tecnica psicoterapica con i pazienti gravi delle indicazioni per i diversi tipi di psicoterapia e per la dimissione nella psicoterapia breve inoltre viene presentato il modello di lavoro del day hospital in situazione di crisi e l'attività di prevenzione dei comportamenti autolesivi e suicidari
